

## Individual reflection

Week 5 | 4/5 - 8/5

---

### What do I want to learn or understand better?

I want to learn more about how the server works, since right now I know nothing.

### How can I help someone else, or the entire team, to learn something new?

When I have time over, I can assist with things that others find hard and try to help them find solutions. I can look over the code written by the others to find errors that can sometimes be hard to find when you're the author of the code.

### What is my contribution towards the team's use of Scrum?

As always, I keep the scrum board up to date by keeping track of the meetings, moving my cards, adding parents/children and colours to the tasks and user stories etc. I've also participated in all the meetings and been active during our discussions.

### What is my contribution towards the team's deliveries?

I finished my tasks, helped others with theirs, and wrote part of the team reflection.
