

Individual reflection

Week 6 | 11/5 - 15/5

What do I want to learn or understand better?

I want to understand how to write a better filter function because the one I wrote does not work properly. Help.

How can I help someone else, or the entire team, to learn something new?

I can do a good code review that helps the team members with writing better code, since it can sometimes be helpful to have someone look over your code and spot mistakes that can be easily missed when you are the author.

What is my contribution towards the team's use of Scrum?

I have contributed in the same way I always do: by keeping the Trello board up to date, attending meetings, and writing the team reflection.

What is my contribution towards the team's deliveries?

I did 2 of my 3 tasks, and helped with some other ones. I also cleaned the code for the search function, even though I was not supposed to... But cleaning code can be fun, sometimes.
