Individual reflection
Week 6

What do I want to learn or understand better?

I want to better understand how to use "document.get…" to get several elements from the html code. I also want to understand why it is written the way it is and how it works. Overall, I want to learn how to connect code in JavaScript and html better.

How can I help someone else or the entire team to learn something new?

If someone has a problem with their code, I can look at it to see if I can help. Since everyone has different knowledge, it can sometimes help to have someone else look at it. If I manage to solve it, I can explain it to them so they in turn can learn something new.

What is my contribution towards the team's use of Scrum?

I have participated in discussions about what choices to make regarding our process. In these discussions we try to come up with a way to proceed in the most agile way possible and use scrum thereafter.

What is my contribution towards the team's deliveries?

This week I worked on the filter function and added the checkboxes for it. When a checkbox is marked, the function will remove all pubs not matching the checked box. When the box is unchecked, all pubs will appear again.
